

Installation Guide

Alternative installation method if the standard installer doesn't work

The recommended installation method is to double-click the .ccx file and complete the installation through Adobe Creative Cloud.

If Adobe Creative Cloud does not launch, the installation fails, the plugin does not appear in Photoshop, or you're running Windows on Arm, follow the manual installation steps below.

WINDOWS MANUAL INSTALLATION

1. Download and extract the ZIP from <https://reviewspaces.io>
2. Rename the .ccx to .zip
3. Extract the renamed ZIP file
4. In File Explorer, navigate to: %APPDATA%\Adobe\UXP\Plugins\External\
5. Create a **ReviewSpaces** folder
6. Copy the plugin files into the folder
7. Open or restart Photoshop

MACOS MANUAL INSTALLATION

1. Download and extract the ZIP from <https://reviewspaces.io>
2. Rename the .ccx to .zip
3. Extract the renamed ZIP file
4. In Finder, navigate to: ~/Library/Application Support/Adobe/UXP/Plugins/External/
5. Create a **ReviewSpaces** folder
6. Copy the plugin files into the folder
7. Open or restart Photoshop

FUTURE UPDATES

To update the plugin in the future, simply replace the files inside the same ReviewSpaces folder with the files from the latest version.
